Subject: 2010 QRA Rancho LPG
Date: Friday, August 16, 2013 12:12:39 PM

Hello Mary-

Ron Conrow wrote to Professor Bea asking if he "knew" about the fact that they had performed a QRA on Rancho that met with the EPA's satisfaction. Have you seen this document? Since we have sooo much "stuff" on this issue...I "thought" that we had a copy. But, found out otherwise. Although we have *heard* about this QRA for over 3 years now.....we have never been provided a copy of this report. Both our homeowners organization and the Northwest Neighborhood Council requested this purported document years ago...but, have never received anything. The only Quest analysis document that we have ever seen is the rebuttal produced by them related to the Cornerstone report. Is there really a comprehensive QRA? If so, how do we acquire a copy. Not only would we like to see it, but Professor Bea at UC Berkeley would also like a copy.

Please let us know asap.

Thank you,
Janet G
